

Stud Welding

ENDURA CLAD
INTERNATIONAL

Enduraclad has three state of art Stud Welding Machines capable of firing reduced based studs from M6 to M24 in diameter.

The machines produce digital read outs ensuring the stud is fired correctly each time to Australian Standards AS1554 Part 2.

Benefits

- Rapid turn around of liners.
- Economical.
- Pre-qualified weld procedures.
- Studs equivalent to Class 4.6 bolts.
- Stainless steel studs available

Applications

ECI can apply studs to::

- Mild Steels Gr 250 & Gr350
- Q&T Steels Gr 80 – 600 HB
- Overlay plate
- Bimetallic liners
- Bimetallic billets & block

All studs are torque tested beyond Australian Standards
